INVESTMENT POLICY

A. I. Belgravia Lynx invests in European equities. The investment objectives are to achieve positive returns and a Sharpe ratio higher than the Stoxx 600 with a volatility of returns lower than the Stoxx 600. The company varies its equity exposure at its discretion, investing the balance in money market instruments.

PORTFOLIO MANAGER COMMENTS

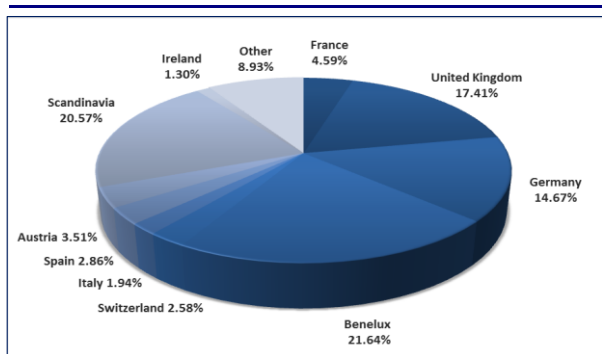

In September Belgravia Lynx dropped by 1.25% with an average beta of 0.02 against the Stoxx 600, which returned 3.9%. European equities won back the summer losses, as fears about North Korea abated and positive macroeconomic data continued.

In September Belgravia Lynx had a poor performance, notwithstanding it was partially due to the strong increase in the euroStoxx 50, whose future we sell to cover market risk. The cash equities portfolio revalued by 3.45%, not enough to fully offset the loss from the euroStoxx 50 futures sold. Best gains came from materials (AMG, Umicore, Clean Teq) and industrials (SGL, Aggreko, Jost). Individually, Hella and ABN excelled.

As of the 30th of September, Belgravia Lynx had a net equity exposure of 12% and a beta of 0.03 against the Stoxx 600.
