

Q.I. BELGRAVIA LYNX

INVESTMENT POLICY

Q. I. Belgravia Lynx invests in European equities. The investment objectives are to achieve positive returns and a Sharpe ratio higher than the Stoxx 600 with a volatility of returns lower than the Stoxx 600. The company varies its equity exposure at its discretion, investing the balance in money market instruments.

PORTFOLIO MANAGER COMMENTS

In September Belgravia Lynx dropped by 1.05% with an average beta of 0.17 against the Stoxx 600, which returned 0.32%. European equities corrected early in the month on increased political risks from Italy and the UK but recovered later fuelled by US strength.

In September Belgravia Lynx had a negative performance due to negative stock picking contribution, particularly in industrials and materials. On the positive side, financials (Scor, NN, Fintech) and utilities (Centrica and Albioma) did well and, individually, Ingenico, Reply, Royal Caribbean and Mips.

As of the 30th of September, Belgravia Lynx had a net equity exposure of 43% and a beta of 0.28 against the Stoxx 600.
