**You are about to purchase a product that is not simple and may be difficult to understand.**

## What is this product?

### **Type:**

Open-ended Investment Company with Variable Capital.

### **Period:**

The Sub-Fund has no maturity date.

### **Investment Objective and Policy:**

The objective of **Quadriga Investors – Belgravia Lynx** (the “Sub-Fund” in the present section) is to seek superior risk adjusted returns associated with exposure to the equity of companies which, in the opinion of the Investment Manager, are mispriced relative to their inherent or embedded value.

In seeking to achieve its objective, the Sub-Fund will mainly invest in equity securities, financial derivatives instruments, fixed-income securities issued or guaranteed by Member States, their sub-divisions, agencies or instrumentalities and money market instruments, without prejudice of the limits and conditions laid down in the prospectus.

The Sub-Fund has no index tracking objective and therefore does not use any replication method.

The primary issuers which the Sub-Fund may be exposed to include issuers located all OECD members (mainly Europe). The Sub-Fund may also be exposed up to 10% of its net assets in issuers located in emerging countries.

The Sub-Fund shall not invest in shares of other sub-funds, UCITS and/or other UCIs above 10% of the net assets of the Sub-Fund.

The Sub-Fund will be actively managed without reference to a benchmark.

The Sub-Fund may also invest up to 30% of its net assets into money market instruments, treasury bills and deposits, this to achieve its investment goals, for treasury purposes and/or in case of unfavorable market conditions.

The Sub-Fund may hold ancillary liquid assets, such as bank deposits at sight, for up to 20% of its net assets.

### **Use of derivatives or other investment techniques and instruments**

The Sub-Fund will invest in financial derivatives instruments for the purpose of achieving its investment objectives.

### **Risk Management Process**

The global risk exposure will be calculated by using the absolute VAR approach. The absolute VaR of the Sub-Fund may not exceed 20% of the Net Asset Value of the Sub-Fund using a confidence interval of 99% and a holding period of one month.

The expected level of leverage based on the sum of all notional amounts will be approximately 300% of the net asset value of the Sub-Fund. Higher levels of leverage are however possible.

### **Recommendation:**

The recommended investment period is five years minimum.

### **Investor Profile:**

Investment in this Sub-Fund is suitable for investors seeking a stable income with moderate level of volatility.

## What are the risks and what could I get in return?

Summary Risk Indicator (SRI):

The Summary Risk Indicator (SRI) makes it possible to assess the level of risk of this product in relation to others. It indicates the likelihood that this product will incur losses in the event of market movements. The risk indicator assumes that you will keep the product for 5 years. This product has been categorized into risk class 3 out of 7, which is a risk between low and medium.

The risk category associated with this SICAV is likely to change over time. The lowest category does not mean risk-free investment.

The Fund may also be exposed to the following risks that are not adequately addressed by the above risk indicator:

**Counterparty risk:** This is the risk that a counterparty to an over-the-counter transaction with the fund may be unable to honor its contractual obligations.

**Liquidity Risk:** This is the risk that a financial market will be unable to accommodate the volume of trading.

**Credit Risk:** Deterioration in the credit quality of an issuer.

As this product offers no protection against market fluctuations, you could lose all or part of your investment.

## Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 5 years Example Investment: 10 000 €		If you exit after 1 year	If you exit after 5 years
<b>Minimum</b>	There is no guaranteed return no matter when you exit		
<b>Stress</b>	<b>What you might get back after costs</b>	5 740 €	5 410 €
	Average return each year	-42.60%	-11.60%
<b>Unfavourable</b>	<b>What you might get back after costs</b>	8 510 €	6 660 €
	Average return each year	-14.90%	-7.80%
<b>Moderate</b>	<b>What you might get back after costs</b>	10 070 €	10 620 €
	Average return each year	0.70%	1.20%
<b>Favourable</b>	<b>What you might get back after costs</b>	13.070 €	12 270 €
	Average return each year	30.70%	4.20%

The unfavourable scenario occurred for an investment in the product between December 2021 and December 2023.

The moderate scenario occurred for an investment in the product between February 2018 and February 2023.

The favourable scenario occurred for an investment in the product between February 2014 and February 2019.

## What happens if the Issuer is unable to pay out?

Losses are not covered by an investor compensation or guarantee scheme. If QUADRIGA ASSET MANAGERS SGIIC S.A. is unable to pay out, the Investor may not recover the sums invested and the Investor may therefore face a financial loss, and will not be able to make a claim to the CNMV.

## What are the costs?

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

— In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

— EUR 10 000 per year is invested.

## COSTS OVER TIME

	If you exit after 1 year	If you exit after 5 years
Total costs	332 €	1 883 €
Impact on return (RIY) per year (*)	3.32%	3.35%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.55% before costs and 1.20% after costs.

## COMPOSITION OF COSTS

One-off costs upon entry or exit	Annual cost impact if you exit after 1 year	
Entry costs	0.00% of the amount you pay in when entering this investment.	0 €
Exit costs	0.00% of your investment before it is paid out to you.	0 €
Ongoing costs		
Management fees and other administrative or operating costs	2.56% of the value of your investment per year. This is an estimate based on actual costs over the last year.	256 €
Transaction costs	0.62% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	62 €
Incidental costs taken under specific conditions		
Performance fees	0.14% The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	14 €

## How long should I hold it and can I take my money out early?

**REQUIRED MINIMUM HOLDING PERIOD: 5 YEARS**

This Fund may not be suitable for investors who plan to withdraw their contribution within 5 years.

## How can I complain?
