**You are about to purchase a product that is not simple and may be difficult to understand.**

## What is this product?

### Type:

Open-ended Investment Company with Variable Capital.

### Period:

The Sub-Fund has no maturity date.

### Investment Objective and Policy:

The objective of **Quadriga Investors – QSR GLOBAL** (the “Sub-Fund” in the present section) is to provide investors with absolute returns through investments, either directly or indirectly via derivatives and/or indices, in a mixed basket of fixed income securities denominated in major world currencies, listed equities and FX pair of currencies through FX strategy, global macro strategy and long/short strategy.

Short exposure will be achieved through the use of derivative instruments. The fund's long positions will be sufficiently liquid to cover at all times the fund's obligations arising from its short positions.

For the purposes of the fund, fixed income securities will include amongst other the following instruments: (i) securities issued or guaranteed by Member States and Non-Member States, their sub-divisions, agencies or instrumentalities, (ii) corporate debt securities and corporate commercial paper, (iii) mortgage-backed and other asset-backed securities which are transferable securities that are collateralized by receivables or other assets, (iv) inflation-indexed bonds issued both by governments and corporations, (v) event-linked bonds issued by both governments and corporations, (vi) securities of international agencies or supranational entities, (vii) freely transferable and unleveraged structured notes, (viii) freely transferable and unleveraged hybrid securities which are transferable securities that combine a traditional stock or bond with an option or forward contract, and (ix) convertible bonds. Fixed income securities may have fixed, variable, or floating rates of interest, and may vary inversely with respect to a reference rate.

The Sub-Fund may invest up to 30% of its assets in fixed income securities with a minimum rating of CCC by Standard & Poor's S&P Global Ratings (or an equivalent rating from another agency).

The Sub-Fund may invest up to 100% of its assets in listed equities.

The Sub-Fund will also invest up to 10% of its assets in FX pair of currencies.

The investment in mortgaged-backed and other asset-backed securities is limited to 20% of the assets of the Sub-Fund.

The investment in contingent convertibles is limited to 10% of the assets of the Sub-Fund.

The Sub-Fund shall not invest in shares of other UCITS and/or other UCIs above 10% of the net assets of the Sub-Fund.

The Sub-Fund may also invest up to 30% of its net assets, into money market instruments, treasury bills and deposits, this to achieve its investment goals, for treasury purposes and/or in case of unfavorable market conditions, but in exceptional and temporary circumstances, this limit can be exceeded, up to 100%, provided that the Management Company considers this to be in the best interests of Shareholders.

The Sub-Fund may hold ancillary liquid assets, such as bank deposits at sight, for up to 20% of its net assets, but in exceptional and temporary circumstances this limit can be exceeded, up to 100%, provided that the Management Company considers this to be in the best interests of Shareholders.

The Sub-Fund may hold both non-EUR denominated securities and non-EUR denominated currency positions. Therefore, movements in both non-EUR denominated fixed income securities and non-EUR denominated currencies can influence the Sub-Fund's return. Currency hedging and trading may be implemented using spot and forward foreign exchange contracts and currency futures, options or swaps.

The Sub-Fund may invest in financial indices such as the Markit iTraxx Europe Main for credit and the S&P 500 for equity and, as well as for hedging purposes. The methodology of these indices is available on the following websites <https://ihsmarkit.com/indx.html> and <https://www.spglobal.com/spdji/en/index-finder>. The constituents of such indices are generally rebalanced on a quarterly or semi-annual basis. The costs associated with the rebalancing of such indices are expected to be generally negligible.

The Sub-Fund will be actively managed without reference to a benchmark

The Sub-Fund intends to use total return swaps linked mainly to equity securities in order to implement its investment policy. The Sub-Fund's exposure to total return swaps is expected to represent approximately 35% of its net asset value and will not exceed 60% of its net asset value.

### Use of derivatives

The Sub-Fund will enter in financial derivatives instruments as a way to gain exposure to various assets (including fixed income securities, listed equities and FX pair of currencies), for efficient management and/or hedging purposes. The Sub-Fund may use financial derivative instruments, either listed or OTC, such as, but not limited to, contracts for differences, swaps, options, forwards and futures.

### Risk Management Process

Under normal conditions, the average expected gross leverage (sum of all notional amounts) is expected to range between 100% and 200% of the net asset value of the Sub-Fund. Under certain circumstances (e.g. market disruption) the expected level of leverage may exceed the above levels.

The highest leverage level should remain below 200% of the net asset value of the Sub-Fund at all times.

The global risk exposure will be calculated by using the absolute VAR approach. The absolute VaR of the Sub-Fund may not exceed 20% of the net asset value of the Sub-Fund using a confidence interval of 99% and a holding period of one month.

### Recommendation:

The recommended investment period is seven years minimum.

### Investor Profile:

Investment in this Sub-Fund is suitable for investors seeking a stable income with moderate level of volatility.

## What are the risks and what could I get in return?

### Summary Risk Indicator (SRI):

The Summary Risk Indicator (SRI) makes it possible to assess the level of risk of this product in relation to others. It indicates the likelihood that this product will incur losses in the event of market movements. The risk indicator assumes that you will keep the product for 7 years. This product has been categorized into risk class 4 out of 7, which is a medium risk class.

The risk category associated with this SICAV is likely to change over time. The lowest category does not mean risk-free investment.

The Fund may also be exposed to the following risks that are not adequately addressed by the above risk indicator:

**Counterparty risk:** This is the risk that a counterparty to an over-the-counter transaction with the fund may be unable to honor its contractual obligations.  
**Liquidity Risk:** This is the risk that a financial market will be unable to accommodate the volume of trading.

**Credit Risk:** Deterioration in the credit quality of an issuer.

As this product offers no protection against market fluctuations, you could lose all or part of your investment.

## Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 7 years Example Investment: 10 000 €		If you exit after 1 year	If you exit after 7 years
Minimum	There is no guaranteed return no matter when you exit		
Stress	What you might get back after costs	1 650 €	1 220 €
	Average return each year	-83.50%	-26.00%
Unfavourable	What you might get back after costs	8 920 €	9 640 €
	Average return each year	-10.80%	-0.50%
Moderate	What you might get back after costs	10 700 €	15 260 €
	Average return each year	7.00%	6.20%
Favourable	What you might get back after costs	12 790 €	20 260 €
	Average return each year	27.90%	10.60%

The unfavourable scenario occurred for an investment in the product between August 2020 and December 2023.

The moderate scenario occurred for an investment in the product between May 2016 and May 2023.

The favourable scenario occurred for an investment in the product between June 2012 and June 2019.

## What happens if the Issuer is unable to pay out?

Losses are not covered by an investor compensation or guarantee scheme. If QUADRIGA ASSET MANAGERS SGIIC S.A. is unable to pay out, the Investor may not recover the sums invested and the Investor may therefore face a financial loss, and will not be able to make a claim to the CNMV.

## What are the costs?

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

— In the first year you would get back the amount that you invested 0% annual return. For the other holding periods we have assumed the product performs as shown in the moderate scenario.

— EUR 10 000 per year is invested.

## COSTS OVER TIME

	If you exit after 1 year	If you exit after 7 years
Total costs	589 €	7 526 €
Impact on return (RIY) per year (*)	5.89%	6.26%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12.46% before costs and 6.20% after costs.

## COMPOSITION OF COSTS

One-off costs upon entry or exit	Annual cost impact if you exit after 1 year.	
Entry costs	0.00% of the amount you pay in when entering this investment.	0 €
Exit costs	0.00% of your investment before it is paid out to you.	0 €
<b>Ongoing costs</b>		
Management fees and other administrative or operating costs	5.30% of the value of your investment per year. This is an estimate based on actual costs over the last year.	530 €
Transaction costs	0.59% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	59 €
<b>Incidental costs taken under specific conditions</b>		
Performance fees	There is no performance-related fee for this product.	0 €

## How long should I hold it and can I take my money out early?

REQUIRED MINIMUM HOLDING PERIOD: 7 YEARS

This Fund may not be suitable for investors who plan to withdraw their contribution within 7 years.

## How can I complain?

Shareholders have the right to complain free of charge and have the possibility to lodge their complaints at the registered office of the Company: QUADRIGA ASSET MANAGERS SGIIC S.A. 6, Cuesta del Sagrado Corazón 6 E-28016 Madrid, Spain.
