Objectives and investment policy

Objectives

- ◆ The fund seeks to achieve an absolute return applying a global macro strategy.

Investment policy

- ◆ The Fixed income securities will include amongst other: (i) securities issued or guaranteed by Member States and Non-Member States, their sub-divisions, agencies or instrumentalities, and (ii) corporate debt securities and corporate commercial paper.
- ◆ The fund is actively managed without following any particular market or index. Overall, the fund is constructed to maintain potential monthly losses below a level of 20%, with a confidence level of 99%. In other words, there is a 1% chance that the month-to-month loss of the net asset value may exceed 20%.

Risk and reward profile

The above indicator shows the risk and reward characteristics of the fund, based on the fund's historical performance over the last 5 years. Where a 5-year performance history is not available, the history has been simulated on the basis of an appropriate benchmark index

- ◆ The indicator above is based on historical data and thus may not be a reliable indication for the future.
- ◆ The indicated risk category is not guaranteed and may change over time.
- ◆ The indicator helps investors have a better understanding of the potential gains and losses of the fund. Even the lowest category does not mean a risk-free investment.
- ◆ The fund is in this category because it uses alternative investment strategies with investment in a range of assets with different levels of risk and the fund's simulated and/or realised return has experienced high rises and falls historically.

Important risks to which the fund is particularly sensitive

- ◆ The fund's performance is determined by trends in financial markets and by economic developments of the issuers, who are themselves affected by both the overall situation of the global economy and by the economic and political conditions prevailing in each country.
- ◆ There may be times where the issuer or guarantor of a fixed income security or derivative cannot meet its payment obligations. The credit rating and risks associated with the securities can change over time and therefore affect the performance of the fund.
- ◆ The fund is subject to interest rate risks in the currencies of the fund assets.
